Educational Researcher

Volume 44, Issue 4

Feature Articles

Susanna Loeb, Luke C. Miller, and James Wyckoff

Performance Screens for School Improvement: The Case of Teacher Tenure Reform in New York City

David Blazar

Grade Assignments and the Teacher Pipeline: A Low-Cost Lever to Improve Student Achievement?

Marcus A. Winters

Understanding the Gap in Special Education Enrollments Between Charter and Traditional Public Schools: Evidence From Denver, Colorado

Reviews/Essays

Angela L. Duckworth and David Scott Yeager

Measurement Matters: Assessing Personal Qualities Other Than Cognitive Ability for Educational Purposes
Technical Comments

Eric Wiebe, Isaac Thompson, and Tara Behrend

MOOCs From the Viewpoint of the Learner: A Response to Perna et al. (2014)

Volume 44, Issue 5

Feature Articles

Peter F. Halpin and Michael J. Kieffer

Describing Profiles of Instructional Practice: A New Approach to Analyzing Classroom Observation Data

Paul L. Morgan, George Farkas, Marianne M. Hillemeier, Richard Mattison, Steve Maczuga, Hui Li, and Michael Cook

Minorities Are Disproportionately Underrepresented in Special Education: Longitudinal Evidence Across Five Disability Conditions

Dan Goldhaber, Lesley Lavery, and Roddy Theobald

Uneven Playing Field? Assessing the Teacher Quality Gap Between Advantaged and Disadvantaged Students
Briefs

Russell D. Ravert, Jessica Gomez-Scott, and M. Brent Donnellan

Equivalency of Paper Versus Tablet Computer Survey Data

Books et al.

Laura W. Perna

Reimagining the Study of Higher Education

Volume 44, Issue 6

Feature Articles

James D. Anderson

David M. Quinn and North Cooc

Science Achievement Gaps by Gender and Race/Ethnicity in Elementary and Middle School: Trends and Predictors
Elizabeth Davidson, Randall Reback, Jonah Rockoff, and Heather L. Schwartz

**Fifty Ways to Leave a Child Behind: Idiosyncrasies and Discrepancies in States’ Implementation of NCLB**

**Briefs**

Thurston Domina, Ryan Lewis, Priyanka Agarwal, and Paul Hanselman

**Professional Sense-Makers: Instructional Specialists in Contemporary Schooling**
Educational Studies in Mathematics

Volume 89, Issue 2

Choosing mathematics: the narrative of the self as a site of agency
Hans Jørgen Braathe, Yvette Solomon

Agency and positioning in a multilingual mathematics classroom
Eva Norén

Positioning in mathematics education: revelations on an imported theory
Beth A. Herbel-Eisenmann, David Wagner, Kate R. Johnson, Heejoo Suh, Hanna Figueras

The role of theory building in the teaching of secondary geometry
Michael Weiss, Patricio Herbst

Erratum to: The role of theory building in the teaching of secondary geometry
Michael Weiss, Patricio Herbst

Is the derivative a function? If so, how do we teach it?
Jungeun Park

On the relations between historical epistemology and students’ conceptual developments in mathematics
Kajsa Bråting, Johanna Pejlare

Multiple representation instruction first versus traditional algorithmic instruction first: Impact in middle school mathematics classrooms
Raymond Flores , Esther Koontz, Fethi A. Inan, Mara Alagic

Comparison of types of generalizations and problem-solving schemas used to solve a mathematical problem
Tatjana Hodnik Čadež, Vida Manfreda Kolar
Schoolteacher trainees’ difficulties about the concepts of attribute and measurement
Dominique Passelaigue, Valérie Munier

The problem of assessing problem solving: can comparative judgement help?
Ian Jones, Matthew Inglis

Research mathematicians’ practices in selecting mathematical problems
Morten Misfeldt, Mikkel Willum Johansen

Symbolising the real of mathematics education
Alexandre Pais

Effects of prompting multiple solutions for modelling problems on students’ performance
Stanislaw Schukajlow, André Krug, Katrin Rakoczy

An analysis of elementary school children’s fractional knowledge depicted with circle, rectangle, and number line representations
Zelha Tunç-Pekkan
Mathematical Thinking and Learning

Volume 17, Issue 2-3

The Acquisition of Preschool Mathematical Abilities: Theoretical, Methodological and Educational Considerations
Joke Torbeyns, Camilla Gilmore & Lieven Verschaffel

Magnitude Representations and Counting Skills in Preschool Children
Sophie Batchelor, Sarah Keeble & Camilla Gilmore

The Relationship Between Children’s Familiarity with Numbers and Their Performance in Bounded and Unbounded Number Line Estimations
Mirjam Ebersbach, Koen Luwel & Lieven Verschaffel

Preschool Children’s Spontaneous Focusing on Numerosity, Subitizing, and Counting Skills as Predictors of Their Mathematical Performance Seven Years Later at School
Minna M. Hannula-Sormunen, Erno Lehtinen & Pekka Räsänen

Assessing Quantitative Reasoning in Young Children
Terezinha Nunes, Peter Bryant, Deborah Evans & Rossana Barros

Early Numeracy and Literacy: Untangling the Relation Between Specific Components
David J. Purpura & Amy R. Napoli

Role of Parent Literacy and Numeracy Expectations and Activities in Predicting Early Numeracy Skills
Eliane Segers, Tijs Kleemans & Ludo Verhoeven

Development and Measurement of Preschoolers’ Quantitative Knowledge
David C. Geary

Discussion From a Mathematics Education Perspective
Douglas Clements & Julie Sarama
Journal of Research in Science Teaching

Volume 52, Issue 5

Exploring prospective teachers' assessment practices: Noticing and interpreting student understanding in the assessment of written work (pages 585–609)
Vicente Talanquer, Molly Bolger and Debra Tomanek
Article first published online: 27 FEB 2015 | DOI: 10.1002/tea.21209

STEM students' social agency and views on working for social change: Are STEM disciplines developing socially and civically responsible students? (pages 610–632)
Juan C. Garibay
Article first published online: 27 FEB 2015 | DOI: 10.1002/tea.21203

Scale construction for graphing: An investigation of students' resources (pages 633–658)
Cesar Delgado and Margaret M. Lucero
Article first published online: 27 FEB 2015 | DOI: 10.1002/tea.21205

A framework for analyzing cognitive demand and content-practices integration: Task analysis guide in science (pages 659–685)
Miray Tekkumru-Kisa, Mary Kay Stein and Christian Schunn
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21208

Measuring choice to participate in optional science learning experiences during early adolescence (pages 686–709)
Li Sha, Christian Schunn and Meghan Bathgate
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21210

Improving primary teachers' attitudes toward science by attitude-focused professional development (pages 710–734)
Sandra I. van Aalderen-Smeets and Juliette H. Walma van der Molen
Article first published online: 27 FEB 2015 | DOI: 10.1002/tea.21218
Obscuring power structures in the physics classroom: Linking teacher positioning, student engagement, and physics identity development (pages 735–762)
Zahra Hazari, Cheryl Cass and Carrie Beattie
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21214

High school opportunities for STEM: Comparing inclusive STEM-focused and comprehensive high schools in two US cities (pages 763–789)
Margaret Eisenhart, Lois Weis, Carrie D. Allen, Kristin Cipollone, Amy Stich and Rachel Dominguez
Article first published online: 27 FEB 2015 | DOI: 10.1002/tea.21213

The relationship between student success in introductory university chemistry and approaches to learning outside of the classroom (pages 790–815)
Michelle L.S. Sinapuelas and Angelica M. Stacy
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21215

Examining student work for evidence of teacher uptake of educative curriculum materials (pages 816–846)
Amber Schultz Bismack, Anna Maria Arias, Elizabeth A. Davis and Annemarie Sullivan Palincsar
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21220

Longitudinal associations among undergraduates' research experience, self-efficacy, and identity (pages 847–867)
Rachael D. Robnett, Martin M. Chemers and Eileen L. Zurbrigggen
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21221

Towards critical appraisal of infographics as scientific inscriptions (pages 868–893)
Joseph L. Polman and Engida H. Gebre
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21225
**Empirical validation of integrated learning performances for hydrologic phenomena: 3rd-grade students’ model-driven explanation-construction (pages 895–921)**
Cory T. Forbes, Laura Zangori and Christina V. Schwarz
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21226

“Science capital”: A conceptual, methodological, and empirical argument for extending bourdieusian notions of capital beyond the arts (pages 922–948)
Louise Archer, Emily Dawson, Jennifer DeWitt, Amy Seakins and Billy Wong
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21227

A strategy for incorporating students’ interests into the high-school science classroom (pages 949–978)
Galit Hagay and Ayelet Baram-Tsabari
Article first published online: 20 MAR 2015 | DOI: 10.1002/tea.21228

Careers “From” but not “in” science: Why are aspirations to be a scientist challenging for minority ethnic students? (pages 979–1002)
Billy Wong
Article first published online: 27 MAY 2015 | DOI: 10.1002/tea.21231

Action at an attentional distance: A study of children's reasoning about causes and effects involving spatial and attentional discontinuity (pages 1003–1030)
Tina A. Grotzer and S. Lynneth Solis
Article first published online: 12 MAY 2015 | DOI: 10.1002/tea.21233

What about a dimension of engagement, equity, and diversity practices? A critique of the next generation science standards (pages 1031–1051)
Alberto J. Rodriguez
Article first published online: 10 APR 2015 | DOI: 10.1002/tea.21232
International Journal of Science Education
Volume 37, Issue 11

Essential Concepts of Nanoscale Science and Technology for High School Students Based on a Delphi Study by the Expert Community
Sohair Sakhnini & Ron Blonder

Korean Secondary Students’ Perception of Scientific Literacy as Global Citizens: Using Global Scientific Literacy Questionnaire
Kongju Mun, Namsoo Shin, Hyunju Lee, Sung-Won Kim, Kyunghee Choi, Sung-Youn Choi & Joseph S. Krajcik

Science Teachers’ Views and Stereotypes of Religion, Scientists and Scientific Research: A call for scientist–science teacher partnerships to promote inquiry-based learning
Nasser Mansour

Development, Evaluation and Use of a Student Experience Survey in Undergraduate Science Laboratories: The Advancing Science by Enhancing Learning in the Laboratory Student Laboratory Learning Experience Survey
Simon C. Barrie, Robert B. Bucat, Mark A. Buntine, Karen Burke da Silva, Geoffrey T. Crisp, Adrian V. George, Ian M. Jamie, Scott H. Kable, Kieran F. Lim, Simon M. Pyke, Justin R. Read, Manjula D. Sharma & Alexandra Yeung

Student Moon Observations and Spatial-Scientific Reasoning
Merryn Cole, Jennifer Wilhelm & Hongwei Yang

Mediating Artifact in Teacher Professional Development
Bodil Svendsen

Student Decision-Making about a Globally Familiar Socioscientific Issue: The value of sharing and comparing views with international counterparts
Marcus Grace, Yeung Chung Lee, Roman Asshoff & Anita Wallin
Scientific Skills as Core Competences in Medical Education: What do medical students think?
Laura Ribeiro, Milton Severo, Margarida Pereira & Maria Amélia Ferreira

Emotionally Intense Science Activities
Donna King, Stephen Ritchie, Maryam Sandhu & Senka Henderson

Students' Learning Activities While Studying Biological Process Diagrams
Marco Kragten, Wilfried Admiraal & Gert Rijlaarsdam

The 2-MEV model: Constancy of adolescent environmental values within an 8-year time frame
F.X. Bogner, B. Johnson, S. Buxner & L. Felix

What Do Students' Explanations Look Like When They Use Second-Hand Data?
Ibrahim Delen & Joseph Krajcik

3Hs Education: Examining hands-on, heads-on and hearts-on early childhood science education
Hatice Zeynep Inan & Taskin Inan

Country, School and Students Factors Associated with Extreme Levels of Science Literacy Across 25 Countries
F. Alivernini & S. Manganelli

Discovering Plate Boundaries in Data-integrated Environments: Preservice Teachers' Conceptualization and Implementation of Scientific Practices
Asli Sezen-Barrie, Joel Moore & Cara E. Roig

Co-development of Conceptual Understanding and Critical Attitude: Analyzing texts on radiocarbon dating
N. Décamp & L. Viennot
Volume 37, Issue 12

Differentiating Science Instruction: Secondary science teachers' practices
Jennifer L. Maeng & Randy L. Bell

Exploration of Korean Students’ Scientific Imagination Using the Scientific Imagination Inventory
Jiyeong Mun, Kongju Mun & Sung-Won Kim

Aspects of Teaching and Learning Science: What students' diaries reveal about inquiry and traditional modes
Aisha Kawalkar & Jyotsna Vijapurkar

Impact of a Scientist–Teacher Collaborative Model on Students, Teachers, and Scientists
Paichi Pat Shein & Chun-Yen Tsai

Who Aspires to a Science Career? A comparison of survey responses from primary and secondary school students
Jennifer DeWitt & Louise Archer

The Intellectual Demands of the Intended Primary Science Curriculum in Korea and Singapore: An analysis based on revised Bloom's taxonomy
Yew-Jin Lee, Mijung Kim & Hye-Gyoung Yoon

Factor Analysis of Drawings: Application to college student models of the greenhouse effect
Julie C. Libarkin, Stephen R. Thomas & Gabriel Ording
Multicultural Inquiry Toward Demystifying Scientific Culture and Learning Science (pages 617–637)
XENIA S. MEYER and BARBARA A. CRAWFORD
Article first published online: 11 MAY 2015 | DOI: 10.1002/sce.21162

“I Was Proud of Myself That I Didn't Give Up and I Did It”: Experiences of Pride and Triumph in Learning Science (pages 638–668)
ALBERTO BELLOCCHI and STEPHEN M. RITCHIE
Article first published online: 14 MAY 2015 | DOI: 10.1002/sce.21159

Values in Science: Making Sense of Biology Doctoral Students’ Critical Examination of a Deterministic Claim in a Media Article (pages 669–695)
ASWATHY RAVEENDRAN and SUGRA CHUNAWALA
Article first published online: 14 MAY 2015 | DOI: 10.1002/sce.21174

Learning Biology Through Innovative Curricula: A Comparison of Game- and Nongame-Based Approaches (pages 696–720)
TROY D. SADLER, WILLIAM L. ROMINE, DEEPIKA MENON, RICHARD E. FERDIG and LEONARD ANNETTA
Article first published online: 19 MAY 2015 | DOI: 10.1002/sce.21171

Diagnostic Opportunities Using Rasch Measurement in the Context of a Misconceptions-Based Physical Science Assessment (pages 721–741)
STEFANIE A. WIND and JESSICA D. GALE
Article first published online: 11 MAY 2015 | DOI: 10.1002/sce.21172

An Empirical Introduction to the Concept of Chemical Element Based on Van Hiele’s Theory of Level Transitions (pages 742–776)
MICHIEL VOGELEZANG, BERRY VAN BERKEL and ADRI VERDONK
Article first published online: 19 MAY 2015 | DOI: 10.1002/sce.21176
DAVID E. LONG
Article first published online: 16 APR 2015 | DOI: 10.1002/sce.21161

JENNIFER WYLD and LYNN D. DIERKING
Article first published online: 16 APR 2015 | DOI: 10.1002/sce.21163

Volume 99, Issue 5

Toward a Descriptive Science of Teaching: How the TDOP Illuminates the Multidimensional Nature of Active Learning in Postsecondary Classrooms (pages 783–818)
MATTHEW T. HORA
Article first published online: 10 JUN 2015 | DOI: 10.1002/sce.21175

Do Inquiring Minds Have Positive Attitudes? The Science Education of Preservice Elementary Teachers (pages 819–836)
CATHERINE RIEGLE-CRUMB, KARISMA MORTON, CHELSEA MOORE, ANTONIA CHIMONIDOU, CYNTHIA LABRAKE and SACHA KOPP
Article first published online: 14 JUL 2015 | DOI: 10.1002/sce.21177

Exploring Teacher Intervention in the Intersection of Digital Resources, Peer Collaboration, and Instructional Design (pages 837–862)
TORUNN AA. STRØMME and ANNIKEN FURBERG
Article first published online: 10 JUN 2015 | DOI: 10.1002/sce.21181

Supporting Preservice Science Teachers’ Ability to Attend and Respond to Student Thinking by Design (pages 863–895)
HOSUN KANG and CHARLES W. ANDERSON
Article first published online: 14 JUL 2015 | DOI: 10.1002/sce.21182
Science Teaching Reform Through Professional Development: Teachers’ Use of a Scientific Classroom Discourse Community Model (pages 896–931)
ELIZABETH B. LEWIS, DALE R. BAKER and BRANDON A. HELDING
Article first published online: 11 MAY 2015 | DOI: 10.1002/sce.21170

Preservice Teachers Developing Coherent Inquiry Investigations in Elementary Astronomy (pages 932–957)
JULIA D. PLUMMER and ARZU TANIS OZCELIK
Article first published online: 15 JUN 2015 | DOI: 10.1002/sce.21180

Promoting Conceptual Coherence Within Context-Based Biology Education (pages 958–985)
MICHA H. J. UMMELS, MARCEL J. A. KAMP, HANS DE KROON and KERST TH. BOERSMA
Article first published online: 14 JUL 2015 | DOI: 10.1002/sce.21179

The Use of Modeling-Based Text to Improve Students' Modeling Competencies (pages 986–1018)
JING-PING JONG, MEI-HUNG CHIU and SHIAO-LAN CHUNG
Article first published online: 14 MAY 2015 | DOI: 10.1002/sce.21164

ZHIHUI FANG
Article first published online: 6 AUG 2015 | DOI: 10.1002/sce.21178
Journal of College Science Teaching

Volume 45, Issue 1

Getting the Most Out of Dual-Listed Courses: Involving Undergraduate Students in Discussion Through Active Learning Techniques
By: Leslie Lyons Duncan, Bethany L. Burkhardt, Laura M. Benneyworth, Christopher M. Tasich, and Benjamin R. Duncan

Turning Scientific Presentations Into Stories
By: Christopher Aruffo

Geographic Affiliation and Sense of Place: Influences on Incoming Online Students' Geological and Meteorological Content Knowledge
By: Jeanne Lambert Sumrall, Renee Clary, and Joshua C. Watson

Interactive Taste Tests Enhance Student Learning
By: Michael Soh, Elizabeth A. Roth-Johnson, Marc Levis-Fitzgerald, and Amy Rowat

Using Reading Quizzes in STEM Classes—The What, Why, and How
By: Linda C. Hodges, Eric C. Anderson, Tara S. Carpenter, Lili Cui, Tiffany Malinky Gerasch, Sarah Leupen, Kalman M. Nanes, and Cynthia R. Wagner

Editorial: Heavy in August
By: Ann Cutler

Point of View: The Next Generation Science Standards: Impact on College Science Teaching
By: James McDonald

Two-Year Community: The Use of Journaling to Assess Student Learning and Acceptance of Evolutionary Science
By: Lawrence C. Scharmann and Wilbert Butler Jr.
Case Study: A Peek Behind the Curtain of Tenure and Promotion
By: Clyde Freeman Herreid, Annie Prud'homme-Genereux, Nancy A. Schiller, Ky F. Herreid, and Carolyn Wright

Research and Teaching: Assessing the Effect of Problem-Based Learning on Undergraduate Student Learning in Biomechanics
By: David Mandeville and Mark Stoner

Research and Teaching: Investigating Preservice Teachers' Self-Efficacy Through Saturday Science
By: David McLaughlin

Research and Teaching: Data Visualization Literacy: Investigating Data Interpretation Along the Novice–Expert Continuum
By: Adam V. Maltese, Dubravka Svetina, and Joseph A. Harsh
International Journal of Mathematical Education in Science and Technology

Volume 46, Issue 5

Calculus students' early concept images of tangent lines
Brittany Vincent, Renee LaRue, Vicki Sealey & Nicole Engelke
pages 641-657

The effect of project-based learning on students’ statistical literacy levels for data representation
Timur Koparan & Bülent Güven
pages 658-686

A quantitative analysis of the relationship between an online homework system and student achievement in pre-calculus
Parisa Babaali & Lidia Gonzalez
pages 687-699

Mexican high school students' social representations of mathematics, its teaching and learning
Gustavo Martínez-Sierra & Marisa Miranda-Tirado
pages 700-720

The prevalence of area-under-a-curve and anti-derivative conceptions over Riemann sum-based conceptions in students’ explanations of definite integrals
Steven R. Jones
pages 721-736

Experience of integrating various technological tools into the study and future teaching of mathematics education students
Dvora Gorev & Irina Gurevich-Leibman
pages 737-751

Teaching transforms: a vector approach
Lars E. Bengtsson
pages 752-765
Alternative approach to second-order linear differential equations with constant coefficients
Antonio Rivera-Figueroa & José Manuel Rivera-Rebolledo
pages 765-775

Closed but provocative questions: curves enclosing unit area
Colin Foster
pages 776-783

Effectively using multiple technologies
Marshall Lassak
pages 783-790

A unifying framework for teaching probability event types
Richard L. Ollerton
pages 790-794

Volume 46, Issue 6

Math majors' visual proofs in a dynamic environment: the case of limit of a function and the $\epsilon-\delta$ approach
Günhan Caglayan
pages 797-823

Threshold concepts in finance: conceptualizing the curriculum
Susan Hoadley, Leonie Tickle, Leigh N. Wood & Tim Kyng
pages 824-840

Incorporating code-based software in an introductory statistics course
Kirsten Doehler & Laura Taylor
pages 841-852

A brief history of the most remarkable numbers $e$, $i$ and $\gamma$ in mathematical sciences with applications
Lokenath Debnath
pages 853-878
Analysis of problems posed by sixth-grade middle school students for the addition of fractions in terms of semantic structures

Tuğrul Kar
pages 879-894

A Chinese young adult non-scientist's epistemologies and her understandings of the concept of speed
Ying Cao & Barbara M. Brizuela
pages 895-915

Using infinite series to calculate the centre of mass of triangular plates
A.A. Soares & L. Caramelo
pages 916-921

A trigonometric identity for $2 \times 2$ block matrices
Christopher S. Withers & Saralees Nadarajah
pages 921-925

Another proof of Euler's identity
Gleb Glebov
pages 926-928

A straightforward method to solve the linear differential equations with constant coefficients of order $n$
Antonio Rivera-Figueroa & José Manuel Rivera-Rebolledo
pages 928-943

Using ‘min’ and ‘max’ functions in calculus teaching
Pavel Satianov, Miriam Dagan & Meirav Amram
pages 944-951
The Journal of Mathematical Behavior

Volume 39, Pages 1-176

Making sense of fraction quotients, one cup at a time
Original Research Article
Pages 1-8
Bob Speiser, Chuck Walter

Preschool children's collective mathematical reasoning during free outdoor play
Original Research Article
Pages 1-10
Lovisa Sumpter, Maria Hedefalk

Two proving strategies of highly successful mathematics majors
Original Research Article
Pages 11-27
Dov Zazkis, Keith Weber, Juan Pablo Mejía-Ramos

Lessons learned from an instructional intervention on proof comprehension
Original Research Article
Pages 28-50
Aron Samkoff, Keith Weber

Students' units coordination activity: A cross-sectional analysis
Original Research Article
Pages 51-66
Anderson Norton, Steven Boyce, Catherine Ulrich, Nathan Phillips

The incubation effect: How mathematicians recover from proving impasses
Original Research Article
Pages 67-78
Milos Savic

Prospective elementary teachers' claiming in responses to false generalizations
Original Research Article
Pages 79-99
David A. Yopp

**Teaching eigenvalues and eigenvectors using models and APOS Theory**
Original Research Article
Pages 100-120
Hilda Salgado, María Trigueros

**Identifying a framework for graphing formulas from expert strategies**
Original Research Article
Pages 121-134
Peter M.G.M. Kop, Fred J.J.M. Janssen, Paul H.M. Drijvers, Marcel V.J. Veenman, Jan H. van Driel

**Quantifying exponential growth: Three conceptual shifts in coordinating multiplicative and additive growth**
Original Research Article
Pages 135-155
Amy B. Ellis, Zekiye Öztürk, Torrey Kulow, Caroline C. Williams, Joel Amidon

**Mental mathematics with mathematical objects other than numbers: The case of operation on functions**
Original Research Article
Pages 156-176
Jérôme Proulx
Research in Mathematics Education

Volume 17, Issue 2

Mathematics teaching: tales of the unexpected
Tim Rowland, Jeremy Hodgen & Yvette Solomon

Triggers of contingency in mathematics teaching
Tim Rowland, Anne Thwaites & Libby Jared

Hiccups within technology mediated lessons: a catalyst for mathematics teachers' epistemological development
Alison Clark-Wilson & Richard Noss

Responding in-the-moment: learning to prepare for the unexpected
John Mason

Planning for the unexpected in the mathematics classroom: an account of teacher and student change
Alf Coles & Hannah Scott

Activity settings and pedagogical categories
Sharada Gade

From ‘Vorstellungsübungen’ to ‘exercises in mathematical imagining’: how changing language changes theoretical perspective
Christof Weber

The mathematics teacher in the digital era: an international perspective on technology focused professional development,
Lulu Healy

The math teachers know: profound understanding of emergent mathematics
Mary Stevenson
Journal for Research in Mathematics Education

Volume 46, Issue 4

Positioning During Group Work on a Novel Task in Algebra II
Anna F. DeJarnette, University of Cincinnati; Gloriana González, University of Illinois at Urbana-Champaign

The Codevelopment of Mathematical Concepts and the Practice of Defining
Marta Kobiela, McGill University; Richard Lehrer, Vanderbilt University

How Students’ Everyday Situations Modify Classroom Mathematical Activity: The Case of Water Consumption
Vanessa Sena Tomaz and Maria Manuela David, Universidade Federal de Minas Gerais

Book Review: An Introduction to Research in Mathematics Education
Reviewed by Keith R. Leatham, Kate R. Johnson, and Steven R. Jones, Brigham Young University
