K–12 Online STEM Education: Promise or Problem?

October 14, 2013, 4:00 – 6:30 PM
SDG&E Energy Innovation Center
4760 Clairemont Mesa Blvd., San Diego, CA

Educators from various schools and organizations will share their successes and challenges regarding online K–12 STEM teaching and learning. The seminar will engage participants in thinking about new advances in flipped classrooms, hybrid approaches, fully online learning, and online supplemental instruction for a range of students including gifted and talented, English Language learners, and students who need extra support. The first half of the seminar will be devoted to a poster session to meet and talk with contributing educators, along with time for networking with colleagues who are working in areas of mutual interest. This will be followed by our invited speaker, who will share her research on this issue, and a moderated panel discussion.

EVENT SCHEDULE
October 14, 2013
